

NEVE. 1654.

A New Almanack and Prognostication, serving for the yeare of our Lord God and Saviour Jesus Christ. 1654.

Being the second yeare after the Bisextile or Leape-yeare.

Wherein is contained a double Kalender viz. the *Julian* or English Accompt, and the *Gregorian* and Forraigne Computation, with the Change of the Moone, her Full and Quarters, and time of the Eclipses: and other necessary observations, convenient to be noted.

Calculated, and exactly rectified, for the Elevation of the Pole Articke, and Meridian of the ancient and famous City of *Norwich*; and may serve generally for the most part of great

BRITAIN.

Practised, penned, and published, by JOHN NEVE, Gent.

Continued yearly by the same Author, and the fifty third time Imprinted.

LONDON,

Printed by S. Z. for the Company of STATIONERS.

**The Contents of this double Kalender for
this year of our Lord God 1654. being
the second yeare after the Bissextile or Leap-
years, according to the Accompt and
Computation of the Church
of ENGLAND.**

junction, ✳ Sextile, ☐ Quartile, ☐ Trine, ☿ Opposi-
tion, ♀ Caput Draconis, ☿ Cauda Draconis,

January nath xxxi. dayes.

If thou be sick and help wouldst have,
The counsell of the Learned crave:
If thou have health, to keepe thee so,
Flie idlenesse as deadly foe.

NEVE. 1654.

A PROGNOSTICATION,
Serving for the yeare of our
Lord God and Saviour
JESUS CHRIST

1654.

Wherein you may observe the
grounds of the alteration and condition of the foure Quarters of this yeare :
As also the disposition of the Aire, for each severall Moneth, according to the inclination of the
Cœlestiall bodies, with the change of the
Moone, her full, and Quarters, and the
time of the Eclipses, with other
things fit to bee knowne
and observed.

Calculated, and especially referred to the Longitude and Elevation of the Pole Artick, of the antient and famous City of *Norwich*, and may serve generally for all *England*.

Collected, and Published, By
JOHN NEVE, Gent.

The 54. Edition by the Author.

Printed at London by *W. Wilson* for the
Company of Stationers. 1654.

A Prognostication.

A Briefe and necessary Rule, for the beginning and ending of the four Termes, with their Returnes.

Hilarie Terme begins Jan. 23. and endeth Febr. 12. and hath foure Returnes.

Octab. Hilar. Jan. 20.	Craft. Purif. Feb. 3.
Quind. Hilar. Jan. 27.	Octab. Purif. Feb. 10.

Easter Terme begins 17. dayes after Easter, and ends the monday after Ascension Day, and hath five Returnes.

Quind Pasch. Aprill 10.	Quinq; Pasch. May 1.
Tres Pasch. Aprill 17.	Craft. Ascen. May 5.
Mense Pasch. Aprill 25.	

Trinity Terme begins the friday after Trinity Sunday, and ends the Wednesday fortnight after, & hath foure returnes.

Craft. Trin. May 22.	Quind. Trin. June 5.
Octab. Trin. May 29.	Tres. Trin. June 12.

Michaelmas Terme begins October, 23. and endeth 28. November, and hath six Returnes.

Tres Mich. Octob. 20.	Craft. Mart. Novem. 12.
Mense Mich. Octob. 27.	Octab. Mart. Novem. 19.
Craft Anim. Novem. 3.	Quind. Mart. Novem. 25.

Note that the Exchequer openeth eight dayes before any Terme begins, except Trinity Terme, in which it openeth onely foure dayes before.

On these dayes following, the Judges sit not at Westminster.

A Prognostication.

Some briefe generall Rules for Husbandry
and Gardening.

The best time to sow all kinde of Corne, is when
the Moone goeth her course in Cancer.

The best time to plant and graft, is in the increase
of the Moone, thes being in Taurus, Virgo or Capricornus.

Remove and set young trees from October till February, in the first quarter of the Moone, thes being in Taurus or Capricornus.

Crop trees and sell wood, that the stock may
the better and sooner grow againe, when the Moone
is in the first quarter.

Sell timber in December and Ian. in the old of the
Moone is best: But if you would have it grow
gaine, cut it downe in the new of the Moone.

The best time to cut Wines, is in the end of Ianuary,
in February, and in the beginning of March, the Moone
increasing in Taurus, Virgo, or Capricornus.

Cut hedges betweene the change and full, from the
end of Ianuary, till the beginning of Iune.

Set and sow all kinde of seeds, the moone being in
Aries, Taurus, Cancer, Virgo, Libra, Capricornus, Aquari-
us, or Pisces: But the seeds whose roots be round,
must be sowne thre or foure daies before or after
the full moone.

Gather all manner of fruits, neere the full Moone,
in a dry time, gather flowers and seeds for sowe, in
the full of the Moone.

Weld cattell, the moone being in Aries, Sagittarius,
or Capricornus: Sheare sheep, cut haye that it may
the sooner grow againe: the Moone increasing, that
is from the change to the full.

To mucke your land that weedes may not abound
is best in the last quarter of the Moone.

A fit time to kill fat swine is in the increase, wigh

Neve. 1654.

shall Moone, the lard will the better endure the
pling.

Destroy wenngs, warts, and Cornes, &c. in the
all quarter of the Moone.

Of all the Eclipses which shall happen this
present yeare of our Lord God 1654. according to
the Excellent observations of Tycho Brahe,
and the prutenick Tables.

There may be obserbed, and apparently scene (un
to the Inhabitants of this our Terrestiall orbe)
this yeare 1654 foure Eclipses, two of the sun, and
two of the moone; whereof the first of the sun shall
be seen by us heere in England: but the other
three will visibly appeare in our Horizon, if the
weather prove to be faire and cleare.

Of the first Eclipse of the Sun.

Upon the 17 of February, in the Gregorian yeare,
but according to our computation, in the Julian
English yeare, on the 7 day of February, betwene
6 and 7 of the clock in the morning, shall appeare a
great eclipse of the Sun, unto the people that dwell
in the south part of the Indians, under the longi-
tude of 132 degrees, and in the south latitude of 42
degrees, the whole continuance of this aforesaid
eclipse, will be two houres and 59 minutes.

Of the second Eclipse of the Moon.

This partle Eclipse of the Moone, may be scene
here with us in England, some small time before
the setting or going downe of the Moone on the 21
February 37 min. after 6 of the clock in the mor-
ning, the beginning of this obscurity will be about
5 of the clock, the middle betwix 6 and 7. and the end
before

A Prognostication:

before 8 of the clock. The totall duration of this Eclipse shall be two houres and 21 minutes.

Of the third Eclipse of the Sun.

The third & great Eclipse of the Sun, shall sensibly visibly appeare unto us heere in England, upon the second of August, halfe an houre after 10 of the clock in the forenoone: the beginning whereof will be before nine, the middle nere ten, and the end shall be nere 11 of the clock. This great defect or obscurity of the Sun, may generally be seene all over Europe: The digits or degrees eclipsed, will be 11 and 55 minutes, the continuance from the beginning to the ending, shall be two houres and 40 minutes. This Eclipse will extend it selfe to be seene unto those that inhabit under the North Latitude of 44 degrees, and in the Longitude of 62 degrees and 30 minutes.

Of the fourth and last Eclipse of the Moone.

There shall be visibly seene of us in our Horizon, in England, another small particle Eclipse of the Moone, upon the 17 day of August, about 11 of the clock at night, the Moone being at that instant, diametrically opposite to the Sun in Balces, a signe of the watery Tripletty, cold and myst, flegmatick, feminine, septentrinall, and common, the house of Jupiter, the exaltation of Venus, and the detriment and fall of Mercury. The beginning of this Eclipse shall be before 10 of the clock, the middle nere 11 of the clock, and the end about 12 of midnight. The degrees eclipsed will be two and fifty foure minutes. The totall duration of this defect or darkness shall be two houres and seven minutes.

Neve. 1654.

The great conjunctions of great Starrs,
The Eclipse of Sun and Moone:
Doth threat great Death, great Dearth and wars,
If we repent not Soone.
Now God above, and wrath above,
And Heaven above relent:
And man beneath, and sinne beneath,
And Earth beneath, Repent.

Briefe Rules and necessary Observations
concerning Bleeding, Bathing, Purging,
and sweating, according to the motions
of the Moone.

Of Bleeding.

When the weather is extreme hot or cold, it is not
then convenient, either to let blood or to purge,
unlesse some great necessity do require it: yet notwithstanding,
if this blood-letting be for the phrensie, the
Spoplexie, for a continuall head-ach, proceeding of
Choler or blood, or any hot-burning fever, or other
extreme pain, a man in such a case may not stay for a
chosen time, because the patient might miscarry in the
mean season: but in this aforesaid case of extremity,
there is not to be let in such a quantity, as otherwise
it would, if a chosen time might conveniently be ex-
pected.

The best time to let the Phlegmatick blood is when
the moon is in Aries or Sagitarius, the head and thighs
excepted. For the Melancholy, the moon being in Libra
or Aquarius, the buttocks and legs excepted.

For the Cholerick, the moon being in Cancer, Scor-
pio, or Pisces, the breast and feet excepted.

For the Sanguine, at the good which before is named.
In Spring time let blood at the right side.

In Hardest time let blood on the left side.

A Prognostication.

Of Bathing.

Bathings are commonly used rather for pleasure than for profit, specially where hot houses are over much haunted: but I intend not to speake of them otherwise than to aduertise those that tender their owne health to be wary and circumspect, in resorting unto them, without cause, and immediately after of with such persons as be uncleane. Know that it is not good to bath, the Moone being in earthly signes, as in Taurus, Virgo, or Capricornus, the reason is, because they are of a cold nature, and the nature of cold is to restraine and bind: and so the moone being in these signes, the pores of the body are closed and shut: so that there can be no resolution of humours, and superfluities which by bathing ought to be aboyded. But in fiery signes, as when the moon is in Aries, Leo, or Sagittarius, then it is a good time for bathing: for then the body is apt to resolution; for it is the nature of heat to open and resolve.

It is best bathing two or three dayes after the change, and at the full of the moone, for then the superfluities are ripe and ready to be aboyded, and disposed to flow and flue out, which indeed is the true end and use of bathing.

If any will enter into the Bath for cleanness sake let the moon be in Libra or Pisces.

Furthermoze, if bathing be used for health, let the party grieved learne of the wise Physician, whether his sickness hath need of moistning or drying, for if it require moistning, as in Pthisis, and such like, then let him bath in watry signes, having good aspects with Iupiter or Venus. But if the sickness require drying, as in Paralysis, and the like, then let him bath, the Moone being in fiery signes, having good aspects with Mars and the Sunne.

Also before you enter into any bath, your body must first be prepared & purged, for if you go in unprepared adventure you may be worse than before.

The best time of the year to bath in is in the Spring, and Harvest, and in the months of May and September.

The best time of the day to go into the bath is one houre after the sun-rising at the least, always provide that you walk either an houre, or halfe an houre before, and have a steele either by nature or art: you must cover your head well so long as you be in the bath, and beware you drink not cold drinke, although you be very thirsty, but forbear all things that be cold, for when you are hot within, cold strike suddenly into some principall member and hurt you.

The time of tarrying in the bath is commonly one houre, but it may be more or lesse, according to the nature of the bath, or sickness of the party, at the discretion of the wise Physician.

For Purging

In purging these five things ought to be knowne.

- 1 } The humour which aboundeth
- 2 } The best way to aboyd it.
- 3 } The strength of the person.
- 4 } The manner of the sickness.
- 5 } The force & nature of the medicine.

For when these things are not considered and observed, many perillous accidents may follow, & greatly hurt the body.

Good signes for purging generally are Cancer, Scorpio, and Pisces, particularly with potions or drinke, the Moon being in Scorpio.

Purge with Eleanaries, the moon being in Cancer, Purge with Pills the Moon being in Pisces.

Take preparatives, the moon being in Gemini, Libra, or Aquarius.

Take

A Prognostication.

Take vomits, the moon being in Aries, Cancer, or Capricornus.

Take Cilliers, the moon being in Libra, or Scorpio.

To provoke Sleepings, the moon being in Cancer, Leo, or Libra.

To stop Fluxes, Rheumes, and Laxes, the moon being in Taurus, Virgo, or Capricorne.

Good to comfort the vertue Attractive, the moon being in Aries, Leo, or Sagittarius.

Good to comfort the vertue digestive, the moon being in Gemini, Libra, or Aquarius.

Good to comfort the vertue Retentive, the moon being in Taurus, Virgo, or Capricornus.

Good to comfort the vertue Expulsive, the moon being in Cancer, Scorpio, or Pisces.

For using of Unguents or Plaisters, they are best to be applyed and used, when the moon is in that signe which governeth the same member or part of the body to which it is applyable.

For Sweatings.

Sweatings, as they are of two sorts, that is to say Naturall and Artificiall, so they are used for two ends and purposes: the naturall sweat, if good heed be taken in opening of the pores will dissolve gross and thick humours, will cleanse the blood, will comfort the spirits, will put away cold, will consume raw humours, qualifie and quench raging Fevers, will help humnells and the droppe.

The Artificiall sweat will cleanse scabs, put away itch, amend dulnesse in hearing, ease the stone, resolve congealed and cold melancholy blood & humours.

But for the better performing and effectuall working in these causes, the counsell of the learned Physician, is to be desired and used.

The best and mozt best signes to sweat in, are Leo, Aries, and Sagittarius, and that two or three dayes after the change, and at the full of the moon. And

And note that sweating is better to be done in the evening than in the morning: for when the body hath nourishment within, the spirits shall not so easily be drawn forth to the extreme parts.

Note further, that leane folks and they of feeble persons, must sweat little, for it will hurt them much: but fat folks may sweat well and it will doe them much good.

A Briefe Description of the foure Quarters of this present yeare of our Lord God. 1654.

Of Winter.

Winter, (which is the chiefeſt for for the Spring, the disgrace of Summer, and the deep debourer of the fruitfull harbest) began to take his effects according to our usuall computation on the 11. of December in the yeare afoze-going, at the first entrance of the Sun, into the first minute of the signe Capricornus, at which time the Sun shall be at his greatest south Declination, from the Equinoctiall line, so that he riseth South-east, and setteth South-west. Now is the Hveall of winter Solstice, for the sun is so far removed from our Zenith, or vertical point, that he cannot decline any further, and stands at a stay or stay, and then is the shortest day and longest night in the year, and so this Quarter both continues untill the 10. of March next following.

This season is by nature cold and moyst, unpleasant for the most part to travellers, either by sea or land, & unto aged persons it is very combous & noysom, causing superfluity of ravenesse, and abundance of cold moystness to over-flow their bodies, to their great troubles and disquietnesse.

The infirmities and Acknesſes, most like to afflict mens bodies this quarter, will bee colds, Hoſes, coughes,

A Prognostication.

coughs, rhumes, appoplexies, collicks, quotidian fevers, cold ill humours indigested, hoarseness and many rhumatick diseases in severall parts of the body.

Thus will the starres if God assent,
Whose power alone can all prevent.

Of the Spring.

The Sun (which is the eye of the world) the fountain of light, and the chiefe moderator of all the rest of the lights,) hath like a Giant run his race, and finished his revolution (Gradatim) throughout the 12. signes, and now this 10. of March beginneth his journey afresh again, and goeth an even course, and so becomes an indifferent Arbitr between the day and night, and maketh an equality throughout his whole government, to the great joy and comfort of all his revived subjects, chyring with his splendent countenance the poore weatherworn weeds of this our darkness of mortality, (which the darkned countenance of winters extremity, had almost subdued) with his excellent presence, whereat the earth begins to smile, and to put on her new apparell, the flourishing liberty of fresh Flora.

This season is by nature hot & moist, the most temperate time of the yeare, and the least border of sickness that doth procure death; and a very convenient time for the removing of sickness & griefs gotten before, and also to avoid and prevent those that are to come: for now the dull senses & spirits of man & other creatures are quickned and revived, and therefore the humours which doe abound, and are readiest to oppress nature, are fit to be emptied and avoided, whether by blood-letting, purging, or otherwise, as the learned Physitian shall advise, and as the cause of the disease shall require: such therefore as be diseased, let them not neglect this time.

The

The diseases and sicknesses most likely to rule and rage this quarter, are tertians, and many unconstant fevers, oppilations, or obstructions in divers parts of the body, jaundies, impostumes, squinances, swellings, itch, boyles, pusshes, measells, small pox, tetters, ringwozmes, bleeding at the nose, with many other diseases which may arise from the corruption of the blood.

Infection from the starres may fall,
But one above doth stay them all.

Of Summer.

Summer the third part of our vulgar years, according to our usuall computation: now when the sun hath fully determined the syzing with his last Grade of Gemini, and hath moved in his motion to the highest point of his course, namely to the 1 Degree of Cancer, which shal be this year the 11. of June. Now is the second Solstice of the year, called the Equinox of Summer Solstice; for even as the sun when he entereth Capricornus, hath his greatest south declination from the Equinoctial line: so now at his ingresse into the beginning of Cancer, he hath his greatest declination toward the north, from the said Equinoctial line; and even then as at the time of the winter solstice he was so far removed from our vertical point, that he could move no further towards the South, and was therfore to approach again towards our North latitude, at which time he seemeth to stand: so now being come so near to our Zenith that he cannot remove no further towards the north, and is therfore to reuert again to the south latitude. At the first going from us he seemeth also to stand, insomuch that then as befoze at his return toward us again, hee made with us the shortest day and longest night in the year: so now at his return from us, he maketh with

A Prognostication

with us contrariwise the longest day and shortest night in the year: and afterwards declineth more and more from us, like as before he moved more and more towards us.

This season according to his proper nature is hot and dry, turning the humours of mens bodies into hotness and dryness, resembling the element of fire and complexion of choler, bringing all fruits to their ripeness, cattell to their fatnesse, and men to their wealth.

The sicknesses and firmites likely to oppress and afflict us this quarter, (according to the judgement of Hypocrites, and many other learned writers of Physick,) are hot burning fevers, phrenzies, inflammations, pluries, spotted fevers, pestilent fevers, impostumes of the lungs, Brangury, ulceration of the bladder, and such other maladies as may proceed of the heate of blood and chollour.

I though stars incline to worke us ill,
All shall be as the maker will.

Of Autumne.

Autumn, according to our accustomed Computations, the last quarter of this yeare, beginneth at the Sunns departure from the last scruple of Virgo, into the first degree of the second Equinoctial signe Libra, the which will be this yeare on the 13 day of September the day and night being of an equall length as in the spring: at which time is the Autumnal Equinoctial, for then as at the Sunns entrance into Aries, the day increasing from the winter Solstice, till then came to be equall with the night, going on still more and more till the summer Solstice, when was the longest day and shortest night: so now the night by increasing from the Equall Solstice, to the Equinox ingredients into Libra, hath got to be equal with the day, and shall encrease more & more, till the Winter Solstice

solstice come again, when the night is longest, and the day shortest.

This time of the year is of it self unconstant & variable, warm in the day time, and cold in the night.

This quarter, because of the inequality of temperature, may, as Hypocrates saith, be called the Mother of a Hurle of deadly sicknesses: And as Galen saith, that this time of the yeare is very dangerous for taking sicknesses.

The bodily sicknesses and diseases, commonly attending this time of the yeare, are many; as the stone, paine in the back and raine, with stopping & suppresing of urine, much topt aches, sciatickes, and gouts, many quartaine fevers, falling sicknesses, vertigoes, appoplexies, pallsies, lethargies, convulsions, cramps, hemoroids, fistules, Tenesmus, Dysenteria and fluxes, melancholy, distraction and madness, windiness and obstructions of the spleen, and such diseases as may proceede of grosse phlegme, and melancholic.

Thus every Planet in his kind,
Is to performe the Almighties minde.

A Declaration of the inclination, and disposition of the winds and weather, according to the severall motions configurations and influences of the erraticall and fixed starres: with the day, houre, and minure of the change of the Moone, her full, and quarters: And also the rising and setting of the Sunne, in every seventh day of every moneth of this present yeare of our Lord God. 1654.

Of January.

Day.	The Sun riseth.	The Sun setteth.
1.	houre. 8. and 3. min.	houre 3. and 57. min.
7.	houre. 7. and 56. min.	houre 4. and 4. min.
14.	houre. 7. and 46. min.	houre 4. and 14. min.
21.	houre. 7. and 34. min.	houre 4. and 26. min.
28.	houre. 7. and 23. min.	houre 4. and 37. min.

A Prognostication.

New Moon the 8. day 53. min. after 3. of the clocke in the afternoon, winterly weather.

First quarter the 15. day 25. min. after 7 of the clock at night, stormy and unconstant.

Full Moone the 22. day 10. min. after 4. of the clocke at night, fitting the season.

Last quarter the 30 day about high noone, some stormy weather and moyllure.

Januaries Abstract.

In this moneth let not blond, neither use but little Physick, except great necessity constraines thee, and beware of taking cold, for in this moneth Rheumes, & Flegme doe much increase: to fast long is hurtfull, but to drinke white-wine fasting is good & whollome, use mentes that are naturally hot moderately, and wear warme cloathes.

In wooldly businesse, this moneth you may set all kind of common fruit trees, or Plants, as Peares, Plum, Cherrie, Filbert, Wallnut, and such like: Hawthorne, and all sorts of Quick-sets, or plants are fittest to be generally set from the change to the first quarter,

Take away mosse and superfluous branches from your trees: and this moneth is good to set Beans, Pease, Parsenips, Radish, Leeks, Garlick, Turnips, and Onions, if the weather prove mild, and the moon past the full: you may begin to graft at the end of this moneth so as the moon be increasing in her light.

Good Husbands also this moneth crop their trees, fell Timber, and geld cattell, such as are to be gelded, the State of the moon alwayes considered.

Of February:

Day.	The Sun riseth.	The Sun setteth.
1.	houre 7. and 13. min.	houre 4. and 47. min.
7.	houre 7. and 4. min.	houre 4. and 56. min.

28.	houre 6. and 22. min.	houre 5. and 38. min.

Neve. 1654.

New moon the 7 day 39 min. after 6 of the clock in the morning, windy and cold.
 First quarter the 14. day neere about 3 of the clock in the morning, frosty and cold.
 Full moone the 21. day 37. min. after 6 of the clock in the morning, cloudy and unconstant.

Februaries Abstract.

In this moneth all stinking fish, Milk and Rice, and such like, that doe oppilate and stop the Liver and veines, or when the blood, are to be eschewed as enemies to health, as also yet forbear Physick, and letting of blood, except necessity do urge, and learned Counsell do advise you: where now of taking Cold, for now are Agues apt to be taken, and it is very ill to take heates and afterwards be taken cold upon them.

Now is the most apt time to graft or plant, and to set all kind of trees and bushes, the wind and weather, and age of the Moone considered, Pease, Beanes, Hasting, Onions, Potatoes, and such like, as in January, may very fitly be set in the wane of the Moone.

The time is now to trim up Gardens, to set and sow all kind of Kitchen Hearbs, to set slips, sow kernels, mustard-seeds, oats, set hops, cut vines, and prun them, stick up our counsellball Pease and Hasting.

Of March.

The Sun riseth.

The Sun setteth.

{	houre 6. and 20. min.	{	houre 5. and 40. min.
	houre 6. and 8. min.		houre 5. and 52. min.

	houre 5. and 22. min.		houre 6. and 38. min.

Last Quarter the 1. day 26 min. after 8 of the clocke in the morning, reasonable temperate.

New moone the 8. day 33. min. after 6 of the clocke at night, overcasting clouds for rayne.

First quarter the 15 day 22 min. after 10 of the clock in the morning, inclined to mystrure.

Full moone the 22. day 17. min. after 10. of the clocke at night, fixing the season.

Last quarter the 30. day neere about 2. of the clock in the morning, cloudy and windy.

©

Marches

A Prognification.

Marches Abstract.

In this Moneth the humours of Mans body begin to increase, and now grow feeding breedeth gross blood and gross humours, and therefore use meates of good digestion, and such as breed good juice: It is a good time to purge and clarify the blood by potions, bathing, and bloodletting, or such other waies as the learned Physitian shall appoint, and as the cause of the disease shall require: Also the moneth sweet meates and drinks are commendable.

The time of grafting as yet endureth, together with setting, sowing, sowing, plashing of Cines, and Hoppes, willow, oates, pease, onions, parsnips, and such like.

Of April.

Day.	The Sun riseth.	The Sun setteth.
1.	houre 5. and 18 min.	houre 6. and 42. min.
7.	houre 5. and 6. min.	houre 6. and 54. min.
14.	houre 4. and 54. min.	houre 7. and 6. min.
21.	houre 4. and 39. min.	houre 7. and 21. min.
28.	houre 4. and 29. min.	houre 7. and 31. min.

New moone the 7 day about 4 of the clock in the morning, ending the season.

First quarter the 13 day 45. min. after 6. of the clock at night. Some Aprill showers.

Full moone the 21. day 51. min. after 1. of the clock in the afternoon, windy and unconstant.

Last quarter the 29. day 22. min. after 4. of the clock in the afternoon, stormy windy weather.

April Abstract.

In this moneth of April, the pores of mans body are opened, and apt to receive Physick, and they that refuse the same, I commit them to the benefit of nature, for at this time of the yeare, this is the best time to prevent causes of sickness, or for speedy remedy in extremities, for now nature doth renew strength through all the body: so where sickness hapneth she soon unburdneeth by means of Physick, wherefore what it cannot doe now, will hardly be done hereafter, therefore take time while time is, &c.

As yet you may graft and poyne blues, and also set melons, citrons, cucumbers, artichokes, and pole-peas, sow barley, Tanners apply themselves to barking of trees.

Neve. 1654.

Of May.

The Sun riseth.

The Sun setteth.

{ houre 4. and 23. min.
 { houre 4. and 15. min.
 { houre 4. and 5. min.
 { houre 3. and 56. min.
 { houre 3. and 50. min.

{ houre 7. and 37. min.
 { houre 7. and 45. min.
 { houre 7. and 55. min.
 { houre 8. and 4. min.
 { houre 8. and 10. min.

New moone the 6. day, 33. min. after 11. of the clock in the
 forenoone, reasonable good weather.

First quarter the 13. day, 54. min. before 4. of the clocke in the
 morning, pleasant weather.

Full Moone the 21 day, 34 min. after 5. of the clocke in the
 evening, faire hot weather.

Last quarter the 29 day, 11 min. after 3. of the clock in the
 morning, some overcasting clouds for rayne.

Mayes Abstract.

In this moneth rise early, for May doth not love any slug-
 gards, and let such as bee in health and able walke into
 fields, and eat and drinke betimes for it is good and
 wholesome, abstaine from all meates that be of a hot nature
 and such as be sick, it is a very good time of the yeare to let
 blood, or to take Physick: such as bee whole, God keepe
 them in health, and such as bee sick, God send them good
 Physicians and Physick.

The time is now fitting to sow Bazill, Marjerom and
 such fine seedes as before might not be sowne, because of the
 coldness of the weather. Set Sage according to the pro-
 verbe, set sage in May and it will last alway, sow flax and
 hemp, set Artichokes, weede your hops, and Gardens, tie
 your grafts that no superfluous branches trouble them.
 Bay dew, Rosemary flowers, and beane-flowers, may at
 this pleasure be distilled this moneth, and now also have a
 care of watching your bees.

Of June.

The Sun riseth.

The Sun setteth.

{ houre 3. and 49 min.

A Prognostication.

New moon the 4. day 29 min. after 7. of the clock at night
good faire weather.

First quarter the 11. day, 8. min. after 5 of the clock in
afternoon, apt for the time.

Full Moone the 19. day, 22. min. after 8. of the clock
night, faire and temperate.

Last quarter the 27. day, 9. min. after 11 of the clock in the
forenoon, hot weather.

Junes Abstract.

In this moneth, if thou must needs use Physick take
early in the morning, that it may have wrought before
the heat of the day, and use a light and thin diet, for the
stomack is not able to digest as in winter, or in some of the
former moneths, and it is very good and convenient for
some to drinke clarified whey, boyled with cold beards, and
to abstaine from violent exercise.

Distilling of roses, making of syrups and conserues, is
now in prime, now gather such herbs as you meane
keepe all the yeare, but be sure you dry them in the shade.
Good husbands and huswives are now weeding their corn
and gardens, & others sheering their sheepe, the time is come
to set rosemary, & gillyflowers, take heed of cutting down
of trees or herbs with knife, but rather gather them with
your fingers, now you may set saffron, carry out compost
make hay, & d gardenes of snaples, ants, or pismires, &c.

Of July.

Day.	The Sun riseth.	The Sun setteth.
1.	houre 3. and 54. min.	houre 8. and 6. min.
7.	houre 3. and 59. min.	houre 8. and 1. min.
14.	houre 4. and 7. min.	houre 7. and 53. min.

28.	houre 4. and 30. min.	houre 7. and 30. min.

New moone the 3. day, 48. min. after 3. of the clocke in the
afterneone, some fall of moyⁿure.

First quarter the 11 day, 47 min. after 7. of the clock in the
morning, unconstant and rainie weather.

Full moone the 19 day, 17 min. after 10. of the clocke in the
foreneone, answerable to the season.

Last quarter the 26 day 6 min. after 5 of the clocke in the
ternoon, summerly hot weater.

Julies Abstract.

In this moneth use cold hearbs & meates, abstaine from physick, and now the rivers are more wholesome then the baths, let the sun be up before you walke abroad, in the time of any pestilence or plague, keepe your chamber windowes shut opening them when the sun hath force of shining, and be sure to perfume your chambers every morning with tarre upon a chaffingdish of coales, then which nothing is better, and use Cardus Benedictus, boyled and drunke fasting. May havest now callen slack husbands to worke, and such as have leasure, it is good to followe for wheat, & to carry out soyle, & to gather seedes & flowers to keepe all the yeare, and to dry them in the shade, till they be almost dry and then let them a while in the sun, & in like manner you may use your hearbs.

Of August.

Day.	The sun riseth.	The sun setteth.
1.	houre 4. and 36. min.	houre 7. and 24. min.
7.	houre 4. and 48. min.	houre 7. and 12. min.
14.	houre 5. and 0. min.	houre 7. and 0. min.
21.	houre 5. and 16. min.	houre 6. and 44. min.
28.	houre 5. and 27. min.	houre 6. and 33. min.

New moone the 2. day, 34. min. after 10. of the clocke in the forenoon, windy and variable.
 First quarter the 10. day 23. min. before 1 of the clock in the morning, apt for the time.
 Full Moon the 17. day, about 11 of the clocke at night, some beared ops and immutabile.
 Last quarter the 24. day, 26. min. after 10. of the clock at night, faire and temperate.
 New moon the day 31 min. 36. after 10 of the clock at night, some reasonable seasonable.

Augusts Abstract.

In August, moderate dyet is good Physick, for now it is dangerous to fast, and take heed of heates and then of colds, for nothing sooner ingendereth Blurties, and use not to sleep much, especially in the afternoone, for making opilations and for avoiding of Agues and head-ach & Catarrhs, and now let a man abstaine from physick except necessity doe compele.

Now Lady Ceres lookes to have men enough to attend her, they that would have good seedes for their gardens the next yeere, must now gather of their owne, least in busying they loose their labour and their money, and such as desire to have lettuce, or other hearbs for winter, may sow seedes in the increase of the moone.
